Bubble Struggle, which is the successor to the very popular classic arcade game from 2002-Bubble Trouble! It's a fun and addicting bubble shooting game (1/2 player) where you play a part in a devil-like character (dressed here in trenchcoat, yellow T-shirt and bright orange shorts). The goal of the game is to destroy dangerous bubbles by dividing them into smaller components and then destroying them all together, preventing the bubbles from touching you. There are tough levels to overcome, with lots of bonuses to collect, such as extra time, defensive shield, slow movement and others. You have a choice of 2 different game modes - One player where you go through different levels; Two players where you can play with a friend (on the same keyboard). Go Bubble Buster! How to Play: Your task is to pop all the bubbles and avoid being hit by a bubble. When you pop a bubble, it splits into two smaller ones. You have to keep splitting them until they disappear. If a bubble touches you - you lose a life. Sometimes, you will see some collectible symbols dropped after the bubble has popped. Collect them as they will give you different bonuses by helping you advance through the levels. The faster you pop all the bubbles, the more points you will get. One player's default controls are on your computer keyboard, and you move left and right left and right by using the Left and Right arrows. Shoot by pressing SPACEBAR. You can choose the control buttons in the 2 Player game (go to the settings in the main menu), or use those that are predefined for each player (A to move left, D to move right and Q to pick up the second player). To play on mobile devices, you'll need to weigh your device horizontally and use the arrows on the screen. We recommend that you use the plug-in keyboard because it's harder to play on your mobile device, especially when you're playing in Player 2 mode.
